Upper and lower flats available in Spring 2020

Construction on two 800 square foot, two-bedroom homes in a fourplex building will continue through the winter of 2019/2020. Both homes have south and east exposures. The upper flat has a wooden deck and the lower flat shares a wide front porch for visiting with neighbors as well as a patio area. The building will be super-insulated and qualify for LEED certification. Owners may install solar panels in the future. New members-owners may choose interior materials and finishes—cabinets, flooring, light fixtures and colors—before construction is complete. Homes on the west side of the building have been sold.
